

Geodesic Dome Cover Pattern for an 8'7" 2V Dome - Top Section

Assembly Notes

The center pentagon in this piece is identical to a side pentagons. Follow the same advice for marking, cutting and glueing pentagon seems.

The edges of the top piece are glued to the top edges of the side pentagons.

Triangular screen pieces, glued into place ventilate the dome nicely.

A rain fly can be fashioned to cover the screen vents at the top using the pentagon pattern without a bottom flap.
